1. Organisation Overview:

- ❖ Name: Nerdy minds
- ❖ Nerdy minds started when learners needed someone to assist with schoolwork other than their designated educators for better understanding. It was founded in 2023 by a passionate university student who ought to help those struggling academically. Nerdy minds used expert tutors to deliver their services and ensures academics are fun, this approach has helped learners boost their marks and find more interest in academics.
- ❖ The business vision is to help unlock the potential and empower the minds of the learners. The mission is to make academics fun and interesting for learners to help them achieve their goals and boost their marks.
- ❖ The business target market are high school learners starting from grade 10-12 and university learners within the commerce and information and communication faculty.

2. Website Goals and Objectives:

- ❖ The goal of the website is to provide online support to learners, provide learner material, showcase expertise and encourage online registrations and sign-ups.
- ❖ The website aims to use client acquisition, conversions, lead generation and engagement as key performance indicators to measure the business's success and progress.

3. Current Website Analysis (if applicable):

- Analyse strengths and weaknesses of the existing website.
- Identify areas for improvement based on the weaknesses identified.

4. Proposed Website Features and Functionality:

- Possible outlined features:
 1. Home page-Call to action prompt and a clear value prop, which enables an online booking system.

2. About-Includes the vision and mission statement, values and tutor profiles.
3. Services-Includes the modules and subjects, prices and sales packages that has a payment gateway for online purchases.
4. Resources-Student materials and past papers will be accessed via resources that has a responsive design and is mobile friendly (Denham, 2024).

5. Design and User Experience:

- Discuss the overall design aesthetic and branding, highlighting the following:
- Colour Scheme: Soft grey #F7F7F7, Sage hint #BFCFBB
- Typography: Cooper black, 36px for H1
 - Cooper black, 24px for H2
 - Open sans, 16px for body
 - open sans, 14px for captions
- Layout and Design: Header includes of a logo, menu and fixed navigator.
 - Banner includes of a headline and call to action prompt
 - Footer includes of the business contact details and social media handles.
- User experience considerations: The navigator includes of a simple menu with vivid labels that prioritise key pages and easy access. The layout has a responsive design with clean lines. The soft grey and sage hint create a sense of peace and tranquility.
- The basic layout includes of a header, banner/hero and footer (Hazzard, 2024).

6. Technical Requirements:

- The business uses frontend technologies to create a foundation of web designs which includes the likes of HTML, CSS, JavaScript
- HTML is used to layout the structure and fill in the required content. It allows allow's developers to join multiple webpages together via a hyperlink to form a website(W3Schools, 2024).
- CSS is used to design the website and make it aesthetic by adding colour and different types of fonts. It adds unique effects, creates a layout of the structure (MDN Web Docs, 2024).

- JavaScript is used to add dynamic elements that encourage interactivity within the websites.

7. Timeline and Milestones:

- The estimated time to create the website can take a minimum of 6 weeks to a maximum of 10 weeks.
- Planning and designing of the website including the addition of content will take place from week1-2.
- The development of the website which refers to the creation of core pages and booking systems will take place from week 3-4, and hope to have completed the core development by the end of week 4.
- Creation of payment integration will take place from week 5-6, this allows us to connect the website with the payment gateway. Testing of the payment integration should be completed by the end of week 6.
- In week 7-8 we should be finalizing content and getting the website ready for use and testing forms and links to ensure everything is ready for operations.
- In week 8-9 quality control should be done to ensure our website meets the required standards of the business.
- The post launch review will take place in the last week which is week 10,we will test for errors and ensure payments work or rather monitor the website performance.

8. Budget:

▪ The estimated budget for Nerdy minds website ranges from R25 000 to R30 000.
▪ Designing and developing the website ranges from R10 000 -R18 000.
▪ Booking systems and payment integration range from R3000-R7500.
▪ The search engine optimization, hosting and addition of content ranges from R3500-R5000.
